## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 29, 2005 has been entered.

### *Response to Arguments*

2. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1 through 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear which specific structural configurations of the at least one heat exchanger are encompassed by the limitation "the at least one heat exchanger is configured to heat said intermediate fluid", thus rendering the metes and bounds of protection sought by the claims indefinite.

### *Claim Rejections - 35 USC § 102*

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3753

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 through 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Moss Maritime A.S. (WO 01/03793 A1, previously of record).

Moss Maritime A.S. discloses an LNG carrier or vessel 1 including at least one heat exchanger 15 at least partially submerged in water and a vaporizer readable on pipeline 6. The at least one heat exchanger is attached to an exterior surface of the LNG carrier or vessel 1 and, as broadly interpreted as required, is integral therewith.

The reference thus reads on the claims.
